Special Release

09 January, 2023

POWER OUTAGE ON CAMPUS

The Ibadan Electricity Distribution Company (IBEDC) has announced notice of planned power outage between 8am-5pm daily, starting from 09 January till 03 February, 2023, in some parts of Ibadan metropolis, Oyo State capital including the University of Ibadan.

The statement released by IBEDC explained that the outage will be due to a planned routine maintenance on the Ayede – Eleyele 132kv line by the Transmission Company of Nigeria (TCN) to improve supply as the maintenance exercise is aimed at increasing capacity of the existing lines.

Management regrets the inconvenience and hardship this will cause members of the University community.

Efforts are, therefore, afoot to alleviate the situation.

The Works and Maintenance Department will work out a schedule for the generator to supply power for certain periods of time.

Thank you for your understanding in this regard.

Olubunmi O. Faluyi, MCIPM
Registrar and Secretary to Council
