Special Release

15 September, 2023

Communication from UHS: Hepatitis B

Be screened and protected

Preventive measures to take to avoid contracting HEPATITIS B:

1. Wash hands as recommended.
2. Avoid unprotected contact with blood and body fluids.
3. Do not have unprotected sex.
4. Avoid having multiple sex partners.
5. Cook food thoroughly, especially meat, poultry, eggs and seafood. Proper cooking kills almost all dangerous microorganisms.

Testing and vaccine for HEPATITIS B are available in the UHS.

Thank you.
